Lift the Burden of Technology from Your Non-Profit Organization
Lift the Burden of Technology from Your Non-Profit Organization

Your non-profit organization depends on your ability to obtain funds and budget them accordingly. Without the proper IT solutions, you can’t focus on gathering the money you need to continue your mission as much as you need to. You may be operating with old, outdated technology due to limited resources, creating stress and less-than-effective operations. ACP Technologies wants to bring your technology up to speed, so you have one less thing to worry about.

Stop Paying for Software Updates and Licenses

Having to shell out money for new licenses and software updates every time your non-profit changes is expensive and unrealistic to furthering the organization’s mission. If your non-profit shrinks, you are then left having paid for software that you are no longer using. ACP Technologies can implement cloud-based IT solutions that automatically updates your software, saving you the time, money, and hassle of handling it yourself. You won’t have to pay for additional licenses to accommodate new staff members either. Free up more money to place towards your other expenses and never worry about paying for upgrades again.

Increase Your Infrastructure’s Scalability

During your fundraisers, you may have a significant influx of volunteers and seasonal workers needing access to your technology. Unfortunately, without a scalable infrastructure, access to your resources are limited to a select number of people. ACP

Did you know... Managers must be able to develop an effective strategy and adapt to a changing environment for their fund to survive.

Technologies can help reduce the stress this causes you and your staff by implementing IT solutions that can expand or shrink to easily accommodate the ebbs and flows of your non-profit. Instead of fighting for resources, your volunteers can redirect their focus on raising more money and furthering your cause.

Anywhere, Anytime Document Access
How many times have you gone to secure a donation and realized you didn’t have the correct documents you need to show the donor? Appearing unorganized in front of donors and contributors may cause you to lose credibility. ACP Technologies can help you preserve your reputation by implementing IT solutions for your non-profit that will allow you to quickly and securely access and share relevant documents from any device, anywhere with Internet access. Next time you’re in front of a contributor, you won’t worry about whether or not you have the right documents. You’ll be able to pull out your phone or tablet and pull up the relevant documents instantly.

Stress-free IT Solutions from ACP Technologies
Instead of stressing about issues other than the core of your non-profit organization, allow ACP Technologies to take the wheel and improve your nonprofit’s efficiency. You’ll be able to utilize just the right amount of technology you need when you need it while keeping your network and infrastructure secure. With ACP Technologies customized IT solutions for nonprofits, your technology is designed to help your organization continue its mission at its best without requiring you to pay for more technology than you need. Partner with us and lift the burden of technology off your non-profit.
